Transport and logistics labels

In logistics, smooth operations, prompt delivery and maximum reliability are essential. Shipping labels play a particularly important role, because they ensure that each package gets to its recipient.

In-house processes also rely on labels, which are placed on boxes and transport containers of all kinds. Automatic processes in the warehouses require pallet labels that stick well to different surfaces and can be scanned from a distance. These labels must meet a variety of requirements. The key is a perfect combination of label material and adhesive.

Labels from HERMA ensure that important information stays with the goods all the way to their destination. HERMA labels can deal with any situation: different kinds boxes and film, rough or smooth surfaces, cool or moist environments, or even dust. Special adhesives permit reliable labelling of shrink film for securing pallets and of pallets themselves.

We know exactly what requirements a label must fulfil:

- Extra-strong adhesion of paper and film labels on boxes and shrink film
- Excellent printing results, even with small fonts and barcodes
- Good barcode readability in the transport chain
- Exceptionally high tack, plus suitability for rough surfaces and machine labelling
- Suitability for direct thermal printers, thermal transfer printers or laser printers
- Special adhesives for labelling in low-temperature storage rooms
- Weatherproof and UV-stable

HERMA direct thermal labels on rolls

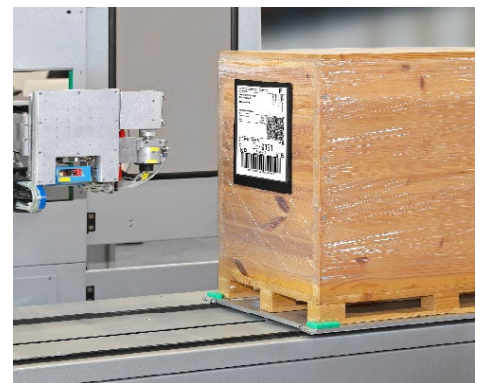

Printing without additional consumables - reliable labelling even at high speeds

Direct thermal printing requires adhesive labels that have a special thermosensitive layer. Heat in the print head "discolours" the label in the desired places and the information becomes visible on the label as black print. With direct thermal printing, high printing speeds are possible - ideal for printing large quantities of labels in a short time.

- High-quality economy, bisphenol A-free
- Print speeds up to 250 mm/s are possible
- Trouble-free running without self-dispensing effect
- Secure adhesion to a wide variety of surfaces
- Easy to use, sophisticated roll technology

Maximum processing reliability during printing and labelling: reliable adhesion to the backing paper, combined with very good dispensing properties in labelling systems, even at high labelling speeds. Because if just one label causes faults, entire packaging lines can come to a standstill.
